OBJECTIVE

Obtain a summer internship as a software engineer at a tech company where I can apply my programming skills and learn more about the industry.

Education

BS in Software Engineering, University of Jeddah, Jeddah
AUGUST 2020 — EXPECTED GRADUATION DECEMBER 2024

GPA 4.9/5

PROFESSIONAL EXPERIENCE

Volunteered in Department of Research and Innovation Committee at Software Engineer Club, University of Jeddah
2024

I organized workshops, coordinated courses, developed student contests, and shared up-to-date field advancements and university news.

Organizer at Association of Children with Disabilities
DECEMBER 2023

I organized events for the children's association. I played a key role in hardware maintenance and managed the streaming of online courses, recording, retaining, and sending them to other parties.

Organizer at University of Jeddah
DECEMBER 2023

I guided university visitors on computer science specializations and introduced a valuable application concept to assist high school students in choosing their academic majors.

Data Entry and Archiving at Women's Charity Association
OCTOBER 2023

I organized and arranged data with precision, facilitating information access and improving overall quality.

Computer Maintenance Technician at Women's Charity Association
JULY 2023

I actively participated as a member of a volunteer team engaged in PC maintenance, demonstrating expertise in resolving system crashes and optimizing hardware performance.

Volunteered in Department of Public Relations at Tanweer Club, University of Jeddah
SEPTEMBER 2021

I collaborated with stakeholders to coordinate events and maintained effective communication for seamless collaboration and successful execution.

TRANING PROGRAM

Foundations of Project Management, Google
SEPTEMBER 2023

Data Analysis and Visualization Using Microsoft Excel, Tuwaiq
MARCH 2023

PROJECTS

Designed and developed a custom database, which included data modelling, schema design, and implementation.

Utilized the Java programming language to develop a comprehensive reservation system with a focus on performance optimization and scalability.

Designed and developed a user-friendly interface for a phone application using a user-cantered design.

Created an employee records system using Java programming language and database management techniques.

Enhanced website interface by applying acquired skills in user interface and user experience design.

Develop a booking website using HTML, CSS, and JavaScript.

Develop and run tests for open-source programs and codes.
